Professional Summary

Full-Stack Developer with proven MERN expertise and hackathon recognition. Built production-ready web applications leveraging backend APIs, real-time systems, and AI/ML integration (OCR, NLP). Specialized in scalable architectures, secure authentication, and performance optimization. Dataverse 2026 winner with hands-on experience in cloud deployment and payment gateway integration.

Technical Skills

- **Languages:** JavaScript, C++, SQL, Python
- **Frontend:** React, HTML/CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database:** MongoDB, SQL
- **Cloud & DevOps:** AWS, Docker, Google Colab
- **AI/ML:** (intermediate level) OCR (Tesseract), (intermediate level) NLP (spaCy), Qwen 3.5:9b Model API
- **Tools:** Git, Postman, Payment Gateways

Professional Experience

Full-Stack Developer — Freelance & Project-Based

EdinvoSync Platform

- Engineered invoice data extraction using OCR with regex pattern matching for invoice field parsing
- Developed backup Azure Invoice Model integration for enhanced accuracy and scalability
- Built middleware APIs for invoice processing workflows and data synchronization
- Collaborated with teams on backend optimization while frontend/backend infrastructure maintained by existing team

MisinfoGuard – Fake Information Detection System

- Engineered full-stack MERN platform analyzing text, images, and PDFs for misinformation with **90% accuracy**
- Deployed custom Qwen 3.5:9b model API via Google Colab for real-time content analysis
- Integrated OCR (Tesseract) and NLP (spaCy) pipelines for unstructured data extraction
- Implemented secure payment gateway (Stripe/Razorpay) for subscription management
- Containerized deployment using Docker for consistent production environments

PocketFlow – Automated Budget & Expense Tracker (v2.0)

- Built full-stack expense management app with recurring transactions, alerts, and analytics
- Enabled automated receipt categorization via OCR and NLP for seamless tracking
- Implemented JWT-based authentication and scheduled reporting workflows

BidForge – Real-Time Auction Platform

- Developed real-time bidding system supporting concurrent auctions and live messaging using WebSockets
- Secured user sessions and implemented notification workflows with transaction integrity

Achievements & Certifications

- **Dataverse 2026 Winner** – Developed data drift detection model for banking datasets (22M+ records), identifying distribution shifts and ensuring model reliability in production
- **Odoo Hackathon Participant** – Built Product Lifecycle Management (PLM) system streamlining versioning and collaboration workflows
- **HackThrone Hackathon** – Developed AI-powered resume screening system for automated candidate shortlisting and analysis

Education

Bachelor of Engineering (B.E.) in Computer Science and Engineering

The Maharaja Sayajirao University of Baroda
CGPA: 7.50 / 10.00

Expected: 2027
